

U.S. Army Fiscal Year 2020 Continuing Resolution Impacts

The FY20 President's Budget request increases the Army's budget by \$2.4B. This budget includes 79 new start investments valued at \$1.9B, 37 production rate increases valued at \$1.6B, and 46 military construction projects valued at \$1.9B, an increase of \$2.8B in operations and maintenance funding, and an additional \$.6B in military personnel funding. The Army will experience severe impacts in all six modernization priorities, delaying the procurement of the Maneuver Short Range Air Defense (MSHORAD) capability (\$262.1M), preventing the procurement and development of Land-Based Hypersonic Missiles (\$228M), and delaying the development of Next Generation Combat Vehicle (NGCV) efforts (\$378.4M).

Actions & Impacts of a 6-month CR

Delays 31 production rate increases (\$1.2B), putting at risk programs like the UH-60M helicopter (15 aircraft valued at \$247M) and necessary Stryker upgrades (70 upgrades valued at \$285M).

Postpones the Army's modernization efforts for the Assured-Positioning, Navigation and Timing Cross Functional Team, preventing procurement of new capabilities valued at \$42.5M. This halts the current fielding of systems to 2nd Cavalry Regiment and rotational Armored Brigade Combat Teams executing missions across Europe.

Postpones prototyping for Individual Visual Augmentation System (IVAS), which will delay procurement by a minimum of 6 to 12 months.

Reduces munitions procurement by \$87.8M, constraining production capacities at the Army's Arsenal and Ammunition Activities (Pine Bluff, Crane, Picatinny, Radford) and delaying contract awards to 4QFY20.

Actions & Impacts of a Yearlong CR

People. If authorities for the FY20 bonuses and special pays are not enacted in CR legislation or NDAA, Active Duty and Reserve Component Entitlements face a reduction of \$597M. This impact slows accessions and hampers recruiting and retention incentives. Maintaining a competitive overall compensation package ensures the long term viability of the all-volunteer force. Prevents the award of 4,400 new family and single Soldier dwellings (\$132M), delays the major maintenance and repair of up to 269 Army family housing units (\$69M), and impedes the restoration and modernization (R&M) of unaccompanied housing (UH) by preventing the award of up to 27 UH R&M projects (\$500M).

Modernization. Prevents \$3.5B in procurement and RDT&E (\$1.1B specific to CFT efforts), upsetting current acquisition strategies for Extended Range Cannon Artillery and Precision Strike Missile, denying contract awards for the Optionally Manned Fighting Vehicle, increases risk to contracting Future Attack Reconnaissance Aircraft, and delays the Army from successfully integrating the spectrum of Network operations necessary for defensive cyber operations.

Readiness. Disrupts major training exercises and events, slows the growth of readiness and execution of maintenance, curtails hiring and recruitment actions, and adversely impacts contracting negotiations.

6-month CR

Delays:
22 New Starts
31 Production Rate Increases

Yearlong CR

Prevents:
79 New Starts
37 Production Rate Increases
46 MILCON Projects

Impacts to FY20
\$8.8B Overall

\$6B MILPERS

\$1.9B New Starts

\$1.6B Production Rate

\$2.8B O&M

\$1.9B MILCON

* Excludes Army Family Housing, Operation and DOD Remediation

Procurement New Starts. The total number of new start programs in FY20 is 79, aligned with \$1.9B in funding requested. There are a minimum of 17 new starts scheduled for the 1st Quarter of FY20 (\$622.4M) and 22 in the 2nd QTR (\$253.8M). There are 16 new starts scheduled for the 3rd QTR (\$545.6M) and 6 in the 4th QTR (\$39.2M). 18 programs are awaiting contract award (\$449.5M).
